SPRINGFIELD ARMORY Edged Weapon Survey Data by Thomas J. Wiltzius

M-1905 Bayonet (Springfield)

Year	Production*	Low Serial No.	High Serial No.
1906	82,100	283	192,882**
1907 (a)	151,467	194,510	240,526**
1908	141,818	240,720	357,906
1909	94,542	358,558	433,425
1910	42,989	433,675	470,452
1911	46,207	474,315	507,965
1912 (b)	35,175	508,962	546,721
1913	40,609	548,282	581,987**
1914	41,639	585,036	609,344
1915	23,309	610,261	632,429
1916	15,649	632,363	651,825
1917 (c)	62,898	654,957	766,160**
1918	134,834	767,958	1,054,446**
1919 (d)	191,902	1,045,130	1,144,283**
1920	72,134	1,123,886	1,170,708
1921	28,704	1,172,280	1,191,461
1922	15,110	1,191,489	1,195,890

* Production figures from Arsenal Of Freedom, Wm. Brophy, and validated by Burton Kellerstedt with exceptions: (a) 154,467; (b) 56,175; (c) 55,198; and, (d) 185,900.

** Indicates where serial number are known to overlap the presented (lowest known) serial number of the following year. This was caused when bayonets were dated at the end of the calendar year, then stored for straightening, inspection and stamping with a serial number. At the beginning of the calendar year, when bayonets in production were stamped with the new year's date and sent to storage, it appears that some of the more recent bayonets were brought out before the slightly older ones.

Low/High serial numbers are from research in progress by author.
